The Board of Governors has decision authority set the amount of "tuition differential" and "non-resident fee" upon request of the Board of Trustees. Current statutes limit the total aggregate increase in resident tuition plus differential to no more than 15% in any given year and the nonresident fee can't be increased more than 15% in any given year. At least 30% of revenue generated by tuition differential must be used for need based student financial aid.
